ONIKAN
GLOBAL SOLUTIONS LLC

NaijaTax Ledger

File right, on time, at a freelancer's price.

Our mission: every Nigerian freelancer and informal earner files on time, keeps the proof, and never overpays to comply.

ONIKAN GLOBAL SOLUTIONS LLC

ONIKANGLOBAL.COM

Built for the African market, priced for its earners.

Oui Capital invests at pre-seed and seed in founders building for the African market, with initial cheques up to $750,000 and a published process of about five weeks.

NaijaTax Ledger meets that frame exactly: a finished Nigerian product, priced below every sourced comparable, riding a dated national filing deadline.

PREPARED FOR	**Oui Capital**
THE ASK	**Lead the $250,000 round (post-money SAFE, $2.5M cap)**
STAGE	**Pre-seed, post-money SAFE**

From January 1, 2026, every Nigerian earner must file.

- Nigeria's four new Tax Acts take effect on January 1, 2026, and every taxable person must register, obtain a Tax ID, and file a return, including a nil return.
- Freelance and foreign-platform income, from Upwork, Fiverr and YouTube, is explicitly taxable for residents.
- Failure to file costs ₦100,000 for the first month and ₦50,000 for every month after.
- The first personal filing deadline under the new regime is March 31, 2027.

93.0 percent of employed Nigerians work informally and 85.6 percent are self-employed. The mandate lands on the earners least equipped to keep records, and no tool priced for them exists.

Sources: Nigeria Tax Administration Act (Official Gazette), sections 4 to 6 and 100 to 101; PwC Nigeria, June 2025; NBS Labour Force Survey Q2 2024.

A ledger that ends in a filed return.

NaijaTax Ledger is a mobile tax ledger for Nigerian freelancers and informal earners, built around the new Acts.

01

Filing pack

Income, expenses and receipts organized into the pack a return is filed from.

02

Receipt vault

Every receipt stored against the income it supports, ready when the return is due.

03

Set-aside tracker

The tax you will owe, tracked as you earn, so the deadline never arrives as a surprise bill.

Four steps, first income to filed return.

1

Register and get your Tax ID

Guided help to register and obtain a Tax ID, from inside the app.

2

Record as you earn

Income and receipts captured in the moment, not reconstructed at the deadline.

3

Set aside as you go

The tracker shows the tax building alongside the income.

4

File from the pack

The filing pack becomes the return, filed before the deadline.

Finished, and in review at both stores.

NaijaTax Ledger is a finished product. All 23 of 23 audit defects from its build review are closed, and version 1.1.0 is in review at Apple and in closed test at Google Play.

PRODUCT	**Finished; 23 of 23 audit defects closed**
APPLE	**Version 1.1.0 in review (resubmitted November 9, 2026)**
GOOGLE PLAY	**Closed test in review; managed publishing on, so release is our chosen moment**
REVENUE	**Pre-revenue; launch follows store approval**

One subscription, priced under every comparable.

₦1,500	₦12,000	$8.97	$74.97
PER MONTH, NIGERIA	PER YEAR, NIGERIA	PER MONTH, US DIASPORA	PER YEAR, US DIASPORA

The only ₦1,500 a month subscription in its competitive set.

THE MARKET ALTERNATIVE

Every live comparable with a public price charges ₦5,000 a month or more, and most charge ₦25,000 or more: Profitna at ₦5,000 per user per month, SmartAkant at ₦10,000 a month, SimplifyTax and TaxEaseNGAI from ₦25,000 a month. The closest consumer offer, TaxPal's one-off report, is ₦1,500 once, not a subscription.

Sources: comparable pricing pages, November 2026.

A market the law itself is creating.

About 3 million Nigerians work in a gig economy worth about $5.2 billion, and the freelancing slice is roughly 570,000 people. Around them stand some 39 million micro, small and medium enterprises. *The demand is not speculative; it is legislated, dated, and priced in penalties.*

Sources: Ipsos study commissioned by Bolt, reported by TechCabal, April 15, 2026; SMEDAN and NBS national MSME survey.

Every figure on this slide is simple multiplication at the published Nigerian monthly price.

SUBSCRIBERS	ANNUAL RUN RATE	IN US DOLLARS
1,000	₦18.0M	about $13,300
10,000	₦180M	about $133,200
100,000	₦1.8B	about $1.33M

Illustrative arithmetic at published prices. Not a forecast.

Assumptions: monthly plan only, 100 percent collection, no churn, before store commissions of about 15 percent. US dollars at the CBN NFEM official rate of ₦1,350.86 to $1, November 10, 2026. 10,000 subscribers is 1.75 percent of the estimated freelancing slice.

FUNDING	**Bootstrapped, $0 raised**
STAGE	**Pre-Series A**
FOUNDER	**Sole founder**

Franklin Onikan

FOUNDER AND CEO

Franklin Onikan is a Nigerian-born founder. He built NaijaTax Ledger for the earners he comes from: freelancers, traders and small operators who now face a filing mandate with penalties attached, and until now, no tool priced for them.

What the capital unlocks

Every dollar goes to launching NaijaTax Ledger and serving its first filing season. The plan runs in three stages, in order.

STAGE ONE

Launch and First Filing Season

Store launch, filing-season support, and marketing inside the freelancer communities where acquisition is cheapest, through the March 31, 2027 deadline.

STAGE TWO

Diaspora Tier

Grow the US diaspora tier at $8.97 a month, serving Nigerian earners on foreign platforms.

STAGE THREE

Bookkeeping Expansion

Build invoicing and records, the ₦5,000 to ₦10,000 a month tier the bookkeeping competitors occupy, on top of the consumer base.

Forward outlook: these stages are plans, not promises. Each stage begins when the prior stage is complete and as capital allows.

13 THE ASK

We invite Oui Capital to lead this round.

Onikan Global Solutions LLC is raising $250,000 for NaijaTax Ledger on a post-money SAFE at a $2.5 million cap, to fund the launch and the full first filing season. We invite Oui Capital to lead the round.
